**Exkursus:**

- 1) 286mm/m rotor is suitable for 15inch wheels or above, and 304mm/m rotor is suitable for 16 inch wheels or above. 330mm/m rotor is suitable for 17 inch wheels or above, and 356mm/m rotor is suitable for 18 inch wheels or above 380mm/m rotor is suitable for 19 inch wheels or above, and 400mm/m rotor is suitable for 20 inch wheels or above.
- 2) When the field says 'NO' in 'OE handbrake function' section, it means that OE handbrake can not work on the vehicle. In order to let your handbrake function work again, you could purchase D2 hydraulic handbrake that we manufacture and install on your car. D2 hydraulic handbrake can be used in drift or rally spec while the vehicle is moving, and it is suitable for parking as well.
- 3) When the field says 'YES' in 'OE handbrake function' section, it means that OE handbrake can still work on the vehicle but is only suitable for parking, not for drift or rally spec while the vehicle is moving as the drum brake is made of aluminum. If you desire the handbrake to be able to work in drift or rally spec while the car is moving, we recommend you fit D2 hydraulic handbrake on your vehicle.

- 5) Any application can be combined in one order.
- 7) We are able to develop any new application that doesn't list on this sheet, and the required quantity is only one set.
